EXPERIENCE

BYTEDANCE, SINGAPORE

Backend Software Engineer Intern **Jan 2026 – Present**

- Built an automated security review system for Trusted Agent Engine (TAE), ByteDance's agent platform, and refined approval rules with the security team, raising the auto-approval rate for network policy releases from 3% to 90%
- Led a zero-downtime migration of TAE's security policy service, MySQL database and Redis cache to a new data center, and batched Redis calls to cut policy publishing time from 87s to 5s
- Built identity and access controls for TAE's agent-to-service connections, migrating more than 13,600 connections across China and international production environments
- Developed multi-tenant access controls and APIs for ByteClaw, a managed AI agent platform, letting business teams manage agent instances, backups, model changes and remote jobs programmatically
- Built an LLM evaluation framework for ByteCloud's AI Assistant with 350 test cases and a results dashboard, letting engineers compare model accuracy, latency and cost across four AI agent roles
- Technologies used: Go, Python, MySQL, Redis, MongoDB

RAKUTEN, SINGAPORE

Full Stack Engineer Intern **Aug 2025 – Dec 2025**

- Developed the merchant-facing interface of an AI ad banner generation platform in the Visual Intelligence department, letting merchants create AI-generated ad banners for their products
- Built a full-stack analytics dashboard (Next.js, NestJS) for tracking all banner generations across the platform
- Technologies used: Next.js, React, NestJS, TypeScript, Tailwind CSS

RAZER, SINGAPORE

Software Engineer (Cloud) Intern **Jan 2025 – Jun 2025**

- Designed and built a greenfield Go scheduled job to automate gift-with-purchase processing, including warranty registration validation and license code delivery
- Built Go services to export and upload product serial numbers to Amazon Transparency
- Added features and backend optimisations to the internal Customer Service Dashboard (Django) and upgraded the Jira sync tool (Python)
- Technologies used: Go, Python, Django, MySQL, AWS S3

GOVTECH, SINGAPORE

Software Engineer Intern **Jan 2024 – Nov 2024**

- Developed Career Kaki, a Ministry of Manpower platform that uses LLMs to help Singaporeans improve their employability, building frontends in Svelte, TypeScript and Tailwind CSS and back-end APIs in Python and FastAPI
- Built a RAG data pipeline: career-site scraping in TypeScript, embedding generation and vector store indexing in Python
- Set up GitLab CI/CD pipelines with automated tests, SAST/DAST security scans and multi-environment deployments
- Technologies used: Python, FastAPI, Svelte, TypeScript, Tailwind CSS, AWS Lambda

LEARNA SYSTEMS PTE LTD, SINGAPORE

Software Engineer Intern **Feb 2023 – Jan 2024**

- Developed and maintained Ruiche, an educational social media platform for parents and educators
- Led the design and implementation of a paid subscription service for exclusive content, driving the app's monetisation
- Technologies used: React, JavaScript, PHP, Laravel, SQL

EDUCATION

NATIONAL UNIVERSITY OF SINGAPORE **2023 – 2027**

Bachelor of Computing in Computer Science (Honours) | GPA: 4.57/5.00

TECHNICAL SKILLS

- Languages: Go (Golang), Python, TypeScript, JavaScript, Java, PHP, SQL, HTML, CSS
- Frameworks & Libraries: Next.js, React, Svelte, Tailwind CSS, NestJS, FastAPI, Django, Flask, Laravel
- Data & Tools: MySQL, PostgreSQL, Redis, MongoDB, AWS Lambda, AWS S3, Docker, Git, GitLab CI, Pytest, Jest
- AI Tools: Claude Code, Codex, Cursor; multi-agent workflows with cross-model code review and custom agent skills

PROJECTS

SHELF | limyuquan.github.io/shelf **Oct 2026**

- Open-source CLI and dashboard (TypeScript, Bun, SQLite, React) for sharing coding-agent skills across projects
- Hooks into Claude Code and Codex renew skills when used and expire unused ones; published on npm

PLANNER | limyuquan.github.io/planner **Oct 2026**

- Open-source split-pane viewer (TypeScript, React, Node.js) for the HTML and Markdown plans coding agents write

NAYAPOCA | nayapoca.vercel.app **Dec 2025**

- Photocard collection tracker for K-pop fans (Next.js, Convex, WorkOS) with collections and moderation
- Camera card recognition running DINOv2 in the browser (Transformers.js), matched by vector search
